<i>Fill large stock pot with water. Heat to simmer. Immerse bags in water, adjusting heat to maintain a low simmer. Stir bags occasionally. Remove bags when cooked to desired texture. Knead bags. Slit bags to serve.</i>					
40005	Diced Egg Product	Use from frozen state			

### Storage & Shelf Life

	Storage		Shelf Life (from date of production)	
	Unopened	Opened/Thawed	Unopened	Opened/Thawed
Hard Cooked (Pillow Pak)	32°F - 40°F	32°F - 40°F	10 weeks	2 – 3 days
Frozen Prepared Egg and Diced Eggs	0°F	38°F	6 months	2 – 3 days
Frozen Liquid Egg	0°F	40°F	12 months	3 days

### Convection Oven

- Place all products on parchment-lined or pan-sprayed baking tray.
- For French Toast, place six (6) pieces of product per pan, glaze side up, uncovered.
- For other products, cover tightly with aluminum foil.
- Check appearance for desirable browning, throughout the cooking process
- After heating, remove from oven, rest or cool products for five (5) minutes, then serve.
- Do not remove ovenable film from wrapped products prior to heating.

### Microwave

- All heating instructions were developed for individual portions, using a 1000-watt microwave.
- Since microwave oven wattage varies, heating times may require adjustments.

### Conventional Oven

- Place products on parchment-lined or pan-sprayed baking tray.
- Place six (6) pieces of French Toast per pan, glaze side up, uncovered.

### Thawing

- For best results, most products should be thawed before preparation or use.
- Breakfast Club (Wrapped) Items:** Thaw in cooler for one day before planned use. Leave ovenable film on.
- Omelets, Frittatas, Patties, Breakfast Wraps, Tac-Gos® and Pre-Cooked Scrambled Eggs:** Thaw under refrigeration overnight.
- Schoolhouse Blend:** Remove bags from case and thaw under refrigeration for 24 hours on rack.
- PanEggCakes®:** Do not thaw prior to preparation.
